Nobody has made any claim for keeping out Wu's people on the score of justice; it is largely a matter of busiss and incidentally of morals.

Jules Verne has lived to see the submarine boat an accomplished fact. The Holland submarine torpedo boat Fulton has made a successful test of remaining under water for 15 hours, or In addition to her crew were officers of the navy, an engineer and an electrician. A severe storm passed over the ocean during the night and sent huge waves to the harbor and shore, but although there was but six feet of water over the top of the turrets those on board felt nothing of the storm. The Fulton settled evenly to the bottom and rested quietly there until she came to the surface in the morning.

In looking over a list of the earnings of nearly 200 railroads, during the summer and fall months it is almost impossible to find one that has not increased its actual earnings and, in some, the increase is noticeable, among them the Santa Fe; Baltimore & Ohio, Boston and Maine, Canadian Pacific, Georgia Central, New Jersey Central, Central Pacific, C. It is rumored that there will be some appointment of Capt. Crozier of Leavworth to the position of chief of ordnance with the rank of brigadier general. Commenting upon the matter the Providence Telegram says: Matters appear to be a little mixed in the appointment of Capt. Crozler to succeed Gen. Buffington, army chiefofordnance. This is a jump over twenty-eight officers who are Crozier's senior in rank. and gives him the rank of brigadier general. The last official act of Buffington was to sign a contract for \$300,000 worth of gun carriages, which had been reported against by the fortifications board. Gen. Buffington maintained that the carriage, which was the joint invention of himself and Capt Crozier, should be continued. Unless Secretary Root revokes this \$300,000 order there will be more inquiries concerning the why, under all circumstances of Crozier's appointment. We are not among those who affirm that advancement must always be by the rule of seniority, and we agree with the president that the od of the service in the army demands that promotions should be made for merit. Merit and experience often go together with seniority, though not always. Now that Crozier is appointed, the question naturally is, what will be-come of Buffington's order for the \$300,-600 worth of goods not wanted.

#### RANSAS' GRAND HARVEST.

The Worcester (Mass.) Spy com ments on Secretary Coburn's recent report as follows:

Everybody knows that the past sea-

son was a proud one for Kansas. It probably is not understood, however, just how great the state's industrial triumph was. The secretary of the triumph was. The secretary of the state agricultural department has just issued a report showing that the total yield of wheat was \$1,000,000 bushels with a home value of \$51,000,000. This yield of wheat surpasses any other harvest in the history of Kansas and exceeds any single harvest of any other state. There was an average of sixty-one bushels for every inhabitant of the state. In spite of the great drought the total value of the wheat and corn crops was but eleven per cent below that of last year. This year's corn crep was \$2,000,000 bushels having a home value of about \$22,000,000. The counties of Summer and Barton produced last summer 12,000,000 bushels of wheat. The secretary points out that taking into account the value of the harvest and that there is already about \$50 per capita in the banks of the state, no one need worry about Kansas' ability to get through the winter comfortably.

"The rappings began about two years ago and were at first terrifying to the family. They came more pronounced as time went on and familiarity lessened their terrors until Miss Neilie offered opportunity for writing which they embraced. She takes a slate to bed with her and placing it and a pencil beneath the covers, instantly the writing begins, the acratching of the pencil plainly heard and the writing perfectly legible. All this with no effect nor action on her part. Questions answered by yes or no, nges of people and the like are answered accurately and promptly by rappings upon the bedstead. Doubting persons or those who speak or act slightingly toward the spirits are met by a storm of rappings upon the bedstead and it and its coverings are tossed about like a boat on storm beaten waters.

"Miss Nallie and her family disclaim any collusion with the spirits. She is the involuntary means of communication with the material world. Some time ago the Shrivers lost a favorite and valuable dog. It mysteriously disappeared; the spirits wrote the names of neighboring boys who killed the dog and threw its body in a sink. #### TWO SUDDEN DEATHS.

Mr. Smith, of Wakarusa, and Mrs. Dunphy, of Carbondale,

Carbondale, Nov. 29.—The people of this community have been greatly shocked by the sudden deaths of two persons within a period of 24 hours. About 5 o'clock Monday evening at the home of Cyrus C. A few minutes later the mother and son returned to the house and found Mr. Smith lying on the floor, in the throes of death.

Tuesday afternoon Mrs. Sarah Ann Dunphy of this place, was weaving a piece of carpet at the home of a neighbor by the name of Johnson.

### BANCROFT ESTATE.

Fortune Left by Dead Historian to

Be Distributed.

New York, Nov. 29.—According to the Herald more than a half million dollars is to be distributed among the heirs of George Bancroft, historian, who died in Washington, D. C., on January 17, 1891. The New York Life Insurance company as trustees brought suit for a construction of certain clauses of the will and also for an accounting of the will and also for an accounting of the will. Mr. Bancroft was 91 years of age at the time of his death. A peculiar feature of his will executed in 1887 was the tying up of the bulk of his fortune until November 1, 1900. Charles C. Glover and James M. Johnson were appointed executors and trustees. The referee, Franklin B. Lord has reported that at the end of three years, the executors turned over to the trust company securities worth \$541,873 and this has since increased to \$514,426. The referee finds that \$68,000 is now sufficient to pay the income to the annuitants. This leaves almost \$550,000 for immediate distribution. This will be as follows:

follows:

One-fourth to the state of John C.

one-twelfth each to Wilder Dwight
